INFO

Kamera Obskur was founded 2007 by Constantin König (Sindar, formerly Lunar Aurora) by curiosity to create music beyond (Black) Metal. After a startup-time of experimentation, in 2008 Constantin started to cooperate with Marcel Breuer (Nocte Obducta, Dinner auf Uranos) who contributed the necessary creative input and competence on guitar and arrangement matters. Dirk Rehfus (Grabnebelfürsten, Allvaters Zorn, Das Kammerspiel) joined as vocalist and Bernhard Klepper (formerly Lunar Aurora, ...) on the drums. In December 2008 Kamera Obskur started to record their first album "Bildfänger" which was completed 2010. Kamera Obskur is not a band but a project of interested musicians who work on loose ideas of sound expressions to make it music.
