GOOD TO KNOW

- Agrypnie is the new band of Nocte Obducta singer Torsten.
- All Members are professional musicians (i.e. guitar player Andreas Ballnus plays for Paul Di'Anno, bass player Carsten Pinkle plays for Cheeno, Philosophobia and is an ex-member of Autumnblaze).
- For the first time, the lyrics are penned by Torsten himself and Marco V. ("Panta Rhei Projekt"), and they are not written by Nocte Obducta mastermind Marcel.
- In opposition to the previous album „F51.4“ Agrypnie set the drum computer aside and engaged a real drummer.
- Agrypnie continue where Nocte Obducta left the path of black metal.

In the beginning AGRYPNIE was originated by Torsten as a solo project and as a refuge for his song ideas long before the well-known avantgarde black metal institution Nocte Obducta parted ways.

After the break up of Nocte Obducta and the Split EP with the German death metal outfit Fated, AGRYPNIE grew from a solo project to a serious band, which is proved by the first full length album "F51.4". With its cold atmosphere, the debut has casted a spell over many listeners.

Torsten and his new live musicians stage-managed this extraordinary atmosphere on carefully selected concerts.

At this point the sequel "Exit" was already in the making. Due to the completion of the line-up, „Exit“ has a much more "organic" sound compared to the debut "F51.4", where Thorsten made use of a drum computer.

With "Exit", AGRYPNIE continue the legacy where Nocte Obducta left the path of atmospheric, innovative black metal.
