Marked Cards

The existence of marked cards is well known these days. That there are opportunities that even pros hardly find out is new. Find out more about marked cards, as well as their use in a game.

False Shuffles

One of the most important basics to cheating is false shuffling. Gregor Ulrich demonstrates different ways of shuffling cards to your advantage.

False Cuts

When one of your takers is cutting the deck, it is supposed to be guaranteed that the order of the deck is genuinely random. A pro can influence the cut, or even reverse this process. Learn how!

False Dealing

How do you deal yourself a good hand? Learn several methods to do so. A few are as follows:

Second Deal - Not the first card is dealt, but the second from the top of the deck.

Bottom Deal - The dealer doesn't hand out the top card, as it appears, but the deck's bottom card.

Deck Switch

The dealer simply replaces a randomly shuffled deck of cards before the very eyes of all spectators with an already prepared, stacked deck.

Cheating at the Real Game

Single tricks are nice to watch, but a real poker game needs more skill, courage and can't be predicted. Take a look at how a cheater will control a real game of poker.

These cardsharpener tricks and many more are explained step by step by pro Gregor Ulrich. Supported by up to five different cameras, each single hand movement is accurately illustrated.
