NOCTE OBDUCTA was formed in 1995 when the band Dëshîra (which started in 1993) split up. At this time the Dëshîra Members Limbach on drums and S.Magic M. on bass hooked up with Alex on keys and NOCTE OBDUCTA mastermind Marcel on guitar and vocals. Late the bass was handed over to Sathonys (now Agathodaimon) and Torsten joined the band as a full vocalist. After experiencing troubles with dozens of rehearsal rooms the band was ready to start first recordings.

Right before the recordings for the first demo "... doch lächeln die blutleeren Lippen / Begräbnisvermählung" Matthias - also drummer in Agathodaimon - joined the band. The demo was recorded in studio during January 1998 and after a few gigs a record deal with Grind Syndicate Media / Nuclear Blast was the first milestone in the history of NOCTE OBDUCTA.

In Summer 1998 the band went in the studio to record the first full length album "Lethe (Gottverreckte Finsternis)". Because of a lot of troubles resulting in a terrible sound the band decided to re-record the album in the Steinberger Studios where the demo was recorded. Finally the the debut album "Lethe" was released at the end of 1998 and received enthusiastic responses from the press.

In spring 1999 keyboard player Alex left the band but Steffen Emanon filled in the gap quickly. With this line up the band recorded the second album "Taverne (In Schatten schäbiger Spelunken)" in August 1999. The album was rated album of the month in the Germany Legacy Magazine.

In November 1999 Sathonys had to leave the band and Shin joined as replacement. Nevertheless NOCTE OBDUCTA recorded two albums in one single year, namely "Galgendämmerung (Von Nebel, Blut und Totgeburten)" and "Schwarzmetall (Ein primitives Zwischenspiel)". S. Magic M. left the band during and Shin after the recordings of "Galgendämmerung" which took more time than expected because of lack of financial possibilities. After finishing the work for "Galgendämmerung" Flerik took over the bass guitar and with Thomas on second guitar the band continued as a six-piece.

In March 2003 NOCTE OBDUCTA inked a deal with Supreme Chaos Records and entered the Maranis Studios to record "Stille (Das nagende Schweigen)" which was released in July 2003 on CD and vinyl. In February 2004 the album was released as a Russian version as well as "Schwarzmetall" was re-released on vinyl due to continuous high demand for the album.

In March 2004 the band completed the studio sessions for the two album masterpiece "Nektar" which was - again - recorded in the Maranis Studios. The first part "Nektar - Teil 1 (Zwölf Monde, eine Handvoll Träume)" was released in August 2004. All resulting reactions were totally overwhelming from both, the fans and the press.

On 25.4.2005 the second part "Nektar - Teil 2 (Seen, Flüsse, Tagebücher)" - which is an even more impressive proof of the bands outstanding position within the metal scene - will hit the European stores.
