SHORT BIO

Once upon a time in a galaxy far away...

VYRE formed after KG Cypher, Hedrykk and Zyan left their former band EIS after shattering anomalies within the bands social fabric. Tmax filled the empty place behind the low frequency cannonry and still with EIS' Marlek on drums, the band recorded a demo which gained them a contract with Supreme Chaos Records.

During the negotiations, drummer Marlek blew himself out of the airlock and was replaced by hard-hitting semi-artificial rhythm machine Android.

Invigorated by recent events, the VYRE crew engaged in an elaborate songwriting process, merging the tristesse of space travel and a tale of epic proportions into a debut album so significant, it had to be split in parts like the best sci-fi stories in history.

"The Initial Frontier" parts 1 and 2 will now see the light of day or the darkness of the universe.

A definite Must-Have for enthusiasts of sophisticated and ahead-of-it's-time-sound like ARCTURUS, ULVER, MANES or DHG.
